THE OVERARCHING STORY

The New Creative Economy For Black Digital Art & Culture

"Nandi's aim is to enable economic participation and cultural preservation of African and the global Black cultural creative content in the age of non-fungible tokens. Nandi is an African cultural marketplace for the world, built in Africa. The world is gearing up towards this critical point where Africa is becoming the center point, and not in the trite ways that we're often described. The NFT space we are creating is an economic ecosystem that directly relates to Black creators, to Black culture, and its value. Embedded in NFTs is an understanding of royalties, licensing, and intellectual property as the core components for how creative goods are traded and distributed online and offline that is essential for Black culture to thrive."

– Jephumba, Co-Founder & CEO.

INTRODUCTION

In 2021, over \$105.6 Billion of cryptocurrency flowed into African wallets, up 1,200% from the previous year. Black and African participation in buying Non-Fungible Tokens (NFTs) was 50% less than the global average during the same period, which amounts to \$400M less dollars from crypto wallets alone that could have made its way to Black creators.

Global Shift

The challenge is that NFTs of art & culture are presented in a marketplace format that focuses on financial aspects around sales or basic category search. Unfortunately, the audience for Black art & culture have benefitted from digital distribution and personalized algorithms. So, lovers of Black culture have become accustomed to curation allowing them to easily discover their favorite artists which has translated into over \$1.2B in music & film streaming and secondary art market transactions.

The leading wallet for NFTs, MetaMask, only has an estimated 10M users, while adoption of blockchain wallets worldwide has reached over 200M users. This indicates, despite the \$40B in NFT transactions, we are in the beginning stages of a global shift in digital cultural content distribution, storage & monetization.

Ethos

We believe that every single art form will migrate to this new system, but Black creators must be deliberate, so the existing system of gatekeepers sharing pennies or digital piracy isn't replicated. Black creators have a rare opportunity to rewrite the rules around their funding and distribution to their audiences. Unlike other marketplaces we are focused on unlocking the resources of crypto-community through curation of Black creators and enabling the mass adoption cultural content by providing seamless fiat onboarding for payment for digital goods.

Nandi's ecosystem will both increase the size of the pie both in and outside of crypto-native by empowering the beauty & diversity of Black creators & the lovers their work.

OVERVIEW

Nandi is a community owned and curated marketplace, built by African Digital Art, Africa's largest creator collective. Established in 2009 African Digital Art is an international award-winning platform recognized for archiving a wide range of artistic production from Africa and the diaspora. For over the past decade, African Digital Art transformed the way the world experienced Black & African art online.

Problem

Limited Discovery – Existing NFT market discovery is driven by financial returns & speculation instead of personalized content themes that most consumers are accustomed

Complexity – The most popular platforms almost seem to pride themselves on participants doing their own research, as opposed to being intuitive. This is most easily seen in the check out experience for consumers.

Misaligned Values – Most creators & brands are acutely aware of their carbon footprint, the costs borne by their fans and focused on protection of their intellectual property

Most NFT markets miss the mark on at least two factors. Energy consumption to process transactions, excessive blockchain gas fees paid by buyers and piracy are common headlines in the NFT market.

SOLUTION – COMMUNITY AS-A SERVICE

The key to the broad adoption of Web3 and blockchain for everyday consumers is the natural evolution of digital assets, from peer-to-peer sharing to streaming of digital cultural goods and now to NFTs. Curated content that's relevant to the largest community of fans will push the envelope beyond early adopting crypto natives.

Nandi is focused on unlocking the power of Black culture's leading creators & communities. We are enabling engagement & utility within NFTs to introduce new users to the power blockchain assets have in creating richer & more equitable digital experiences.

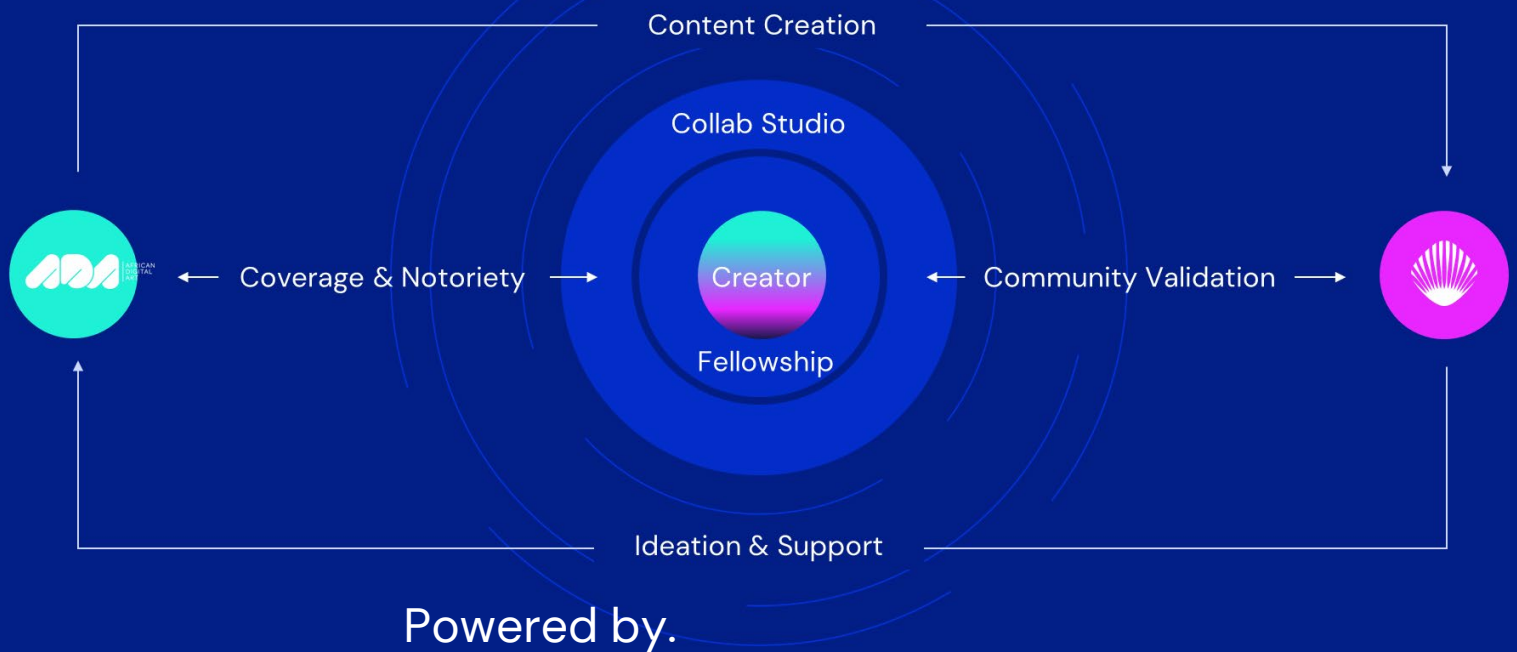

Most NFT marketplaces target crypto whales as buyers, instruct the creators to build their own crypto community and translate the value locked on various blockchains into NFTs.

Nandi is different by design.

HOW NANDI WORKS

Nandi Creator Pathways.

Nandi Cowry NFTs – are our membership/governance token, which identifies & funds emerging Black creators through an ecosystem anchored by fellowships with cultural institutions. Holders of the NFT can vote to curate our marketplace, along with loyalty & club membership benefits in digital and physical spaces.

NANDI Market – multi-chain platform that leverages ADA's rich content library & empowers creators to mint, buy & sell NFTs on Celo, Solana, Cardano and other innovative scaling solutions. The market pairs with our Nandi Hub for creator audience management and our Collab Studio, which manages creators & brand entry in Web3 & the Metaverse.

\$NANDI Token – our commercial token rewards the most active readers, creators and collectors on ADA & Nandi to vote for any crowdsourced designs, participate in featured art curation and enables staking within the platform

COLLAB STUDIO

The Collab Studio is the innovation engine that embeds the African Digital Art collective within Nandi to unlock financial opportunities within the ecosystem.

The focus is to collaboratively develop 3d designs, music, gaming, film and other digital fine arts to launch on Nandi market. Creators & Brands will be able to engage with the Collab Studio to commission their own Web3 drops in direct sourced and gamified design competitions that engage the creator & brand broader communities.

Our mission is to push digital boundaries to create sustainable prosperity for creators. We've been surprised how revolutionary that simple concept is when it comes to Black creators especially. Commissioned projects alone for the Collab Studio are unable to enable the broadest set of Black creators to achieve prosperity,

we also don't believe creator participation on a profit centric marketplace achieve those aim. We believe the community must fund itself & create a sustainable model that supports the African Digital Art collective & the Black creator community writ large to develop their own projects and broader community initiatives.

NANDI COWRY MEMBERSHIP NFT –

Our first Collab Studio project, Nandi Cowry NFTs will feature 10,000 limited editions, hand drawn characters representing the Nandi tribe. The lead designer for the project, Sindiso R!OT, is renowned and an African Digital Art collective member.

Community Funding

The proceeds of the sale provide the foundational base of community funding with a treasury that will be continually replenished by Nandi Market sales 3% transaction fees. Nandi's transaction fee commitment will be enshrined by providing Nandi Cowry NFT holders governance & curation rights over the marketplace.

The governance & curation rights will evolve over time, this is in recognition of the need for the speed & flexibility at the earliest stages of a business.

Sindiso R!OT

Johannesburg based artist that designed South Africa's Mandela Centenary coin. He's been showcased at museums from The Vitra Design Museum, The Guggenheim Bilbao Museum, and The Museum of Modern Art in Mexico City

MEMBERSHIP TIERS & BENEFITS

Each Nandi Cowry is unique and has its own rarity characteristics, however each can be grouped into 3 rarity tiers with their own respective benefits.

Tribe Member

5,263 Total

- The perks of Nandi Cowry
- 1.5X \$NANDI community reward acceleration
- Curate the location of our in person Drop Shops
- Preview Access to NFT drops on Nandi Market
- Access to members-only Telegram channels, including access to African Digital Art's premium content library
- Free Entry into the Nandi's metaverse, Digital FESTAC and its art & concert experiences

Chief Member

3,737 Total

- **Tribe Member perks +**
- 2x the \$NANDI community reward acceleration
- \$NANDI credits for 1 plot of land in Digital FESTAC
- Access to official Nandi Cowry IRL events with up to 2 guests such as art fair & gallery previews to private member events at partner convenings

Founding Member

1,000 Total

- **Tribe & Chief Member perks +**
- 4x \$NANDI community reward acceleration
- \$NANDI credits for 2 plots of land in Digital FESTAC
- Access to official Nandi Cowry IRL events with up to 5 guests
- 3 NFT Commissioned Designs by Collab Studio
- Access to club reciprocity with other Founding Members who opt-in to participating

Gallery Experiences

NANDI MARKET

The Nandi Multi-Chain Marketplace will provide a venue for buyers and sellers (both primary and secondary), to have a seamless buying experience leveraging fiat and crypto rails. Keys to enabling this in Black & African communities is to obscure away the crypto complexity, focusing on the creators and their communities regardless of the blockchain.

Carbon Negative/Neutral Pledge

Our blockchain choices, Celo, Near, Solana, BSC and more are reflective of the values our community has vocalized around energy consumption. Carbon negativity or neutrality are seen as table stakes. So any chain we onboard, will be prioritized by their climate impact and we will increase the transaction fees on the smart contract to reflect the purchase of carbon offsets for chains that do not do so themselves.

Creator/Brand/Curated Collections

Creators, Brands & Curators can mint collections of NFTs with a predetermined number of copies and specified rarity properties.

Community & Access Tokens

Reward your most loyal fans by offering exclusive NFTs available only to your existing NFT holders. Manage membership like a community or a decentralized loyalty program.

Demand Generation

We are focused on creating that demand through partnerships, seamless fiat onboarding, integrating with technology bridges with & unlocking the 1.3 billion population of Africa through payment system innovations that mirror Web3 onboarding infrastructure available in other markets.

VALUE PROPOSITION

As a community led platform, we've listened and recognized the financialization of culture & creators creates misaligned incentives for many on both sides of the creator – audience spectrum. We intend for Nandi to strike a balance by rewarding creators & consumers of content based upon intrinsic interest alone and pairing that evening with rewards for buying & selling through the platform. Those rewards also recognize the value of the users' culture consumption profile data we will develop & combine with ethically collected 3rd party data sources to provide to creators as a resource.

Discovery = Distribution

For over a decade African Digital Art has pioneered early discovery of Black digital creators through content curation & visualization that has captivated millions of viewers. Nandi will utilize those unique insights to build a unique market that layers cultural context for potential buyers, like Netflix or Amazon's recommendation algorithms.

We intend to embed ADA's content library & other content partners within a "Culture Feed" on the Nandi platform to collect these insights but also to inform & educate lovers of Black culture on the diversity of the creators within the community. Nandi users will be rewarded for their consumption of the content through the Nandi token rewards program. Content partners equally will have their minted content or gated content libraries available for direct purchase in their Nandi Hub priced in fiat, crypto and \$NANDI.

Community As-A Service

Our foundations over a decade have seen many platforms burn hot and flame out, but the unique property that has kept African Digital Art and other digital platforms alive at the core has been community

So our marketplace approach is driven by that same lifeblood, but instead of instructing each creator to go out and create their own community in order to successfully launch meaningful NFT drops, we've done the hard work for them by creating the Nandi Cowry community as a resource that economically and philosophically benefit from successful NFT drops on Nandi.

This audience cross-pollination and shared benefit is core to the sustained growth of the larger Black creator community.

VALUE CAPTURE

We've structured our smart contract and content licensing terms to reflect the community value proposition in primary & secondary sales. We've also developed a partnership model to unlock benefits for existing ecosystem actors like gallerists, record labels, film producers & studios and other cultural curators & aggregators.

NANDI HUB

A central part of Nandi's value proposition is connecting creators directly to their audience. A key component is our Hub so that creators develop relationships beyond transaction with their audience

. The Nandi Hub makes it easy for creators & brands to create and manage NFTs without any tech skills – by automating the launch of design competitions and specific designer commissions.

The main feature of the hub connects existing audiences & conversations across social media platforms and layers data for the creator to have actionable insights on the demographics and interests of their audience. is the ability to sell or drop, free or low-cost NFTs to existing fans and customers.

Opportunities in Web3 for brands are only limited by their imagination. Brands can launch metaverse properties, grant VR access, utilize gaming incentives, merge with physical retail or ecommerce experiences. As a result, the Hub provides several specific benefits to brands:

1. Direct community management with existing fans across existing social media platforms, Nandi & layered with audience data
2. Strategic monetization through services and content offering additional utility via NFTs,

Additionally, the Hub allows brands to:

1. Define user benefits for holding NFTs
2. Launch a Collab Studio design competition
3. Communicate with users
4. Track NFT activity
5. Reward user actions
6. Connect to physical retail
7. Enable secure access to content and/or services

PRIME SECTORS

While any brand can benefit from an NFT strategy, Nandi has identified several sectors with immediate benefits and sizeable existing audiences:

SPORTS

We are targeting sizeable audiences & global footprints like football & baseball, and motorsports.

CELEBRITIES

Black America, the Caribbean & Africa have a number of global & regional stars who are extremely popular on global stages and submarkets, like Francophone or Soca. Again, working with Celebrities with audiences that are sizeable & maintain a global footprint yet are not widely known to mainstream audiences.

BRANDS

Global brands and their Black, African & Caribbean counterparts can benefit from tapping into Web3 as an alternative or an addition to traditional marketing integrations.

NANDI TOKEN PLATFORM

The \$NANDI utility token supply is 1,000,000,000 tokens and all tokens allocated to the community will be earned by engagement throughout the Nandi ecosystem – from creators selling and contributing to brand design competitions to lovers of culture reading content or buying NFTs in Nandi Market.

Reward System

Monthly \$NANDI tokens will be issued to all ecosystem actors, Nandi Cowry NFT holders will be rewarded at accelerated levels based on the rarity of their NFTs. A pillar of our values is to reward intrinsically motivated artistry and engagement instead of the financialization of art & culture. Consequently, buying, selling and Nandi Cowry NFT ownership are only considered in a basket of factors around participatory economics.

Moreover, Nandi Cowry NFT ownership is only the 1st step, holders must engage on Nandi to receive the benefits of ownership related to governance & curation.

Use Case

Nandi token benefits include:

- Early Access to Drops
- Event Admissions
- Voting
- Brand & Creator Rewards
- Staking
- Purchase Land in Digital FESTAC
- DeFi

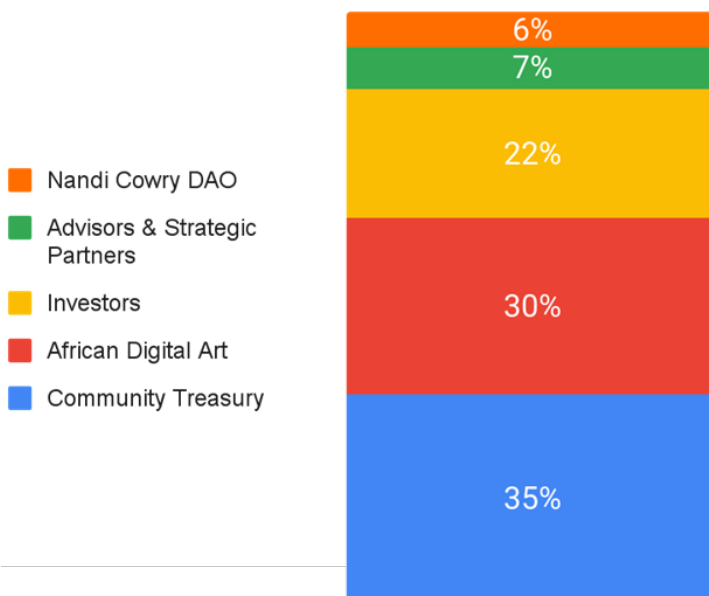

Since \$NANDI will be tied to the wallet address of the Nandi Cowry holder at the point of ownership, the governance & curation rights do not convey simultaneously unless sold with the Nandi Cowry NFT. This reinforces the intrinsic value of the \$NANDI and ties that to the ongoing appreciation of Nandi Cowry NFTs.

TEAM

The Nandi team is based in Nairobi, Kenya and globally distributed in Africa and the diaspora. African Digital Art was bootstrapped through the intrinsic motivation of Jepchumba driven by international awards and passion. The transition to Web 3.0 has been funded by Africa & the diaspora's leading crypto and women-led venture capital firms and angel investors.

Founders

Jepchumba

CEO

Founder of African Digital Art, former Ushahidi team member - an African digital artist, curator, and cultural technologist.

Chinedu Enekwe

Business Director

Former founding principal of Exponential Creativity Ventures - NY leading seed investor in creative tools and Techstars VC in Residence.

Ngozi Odita

Community Director

Founder of SMW Lagos & AfricanXT the largest African technology conference.

Industry Leading Advisors

Biola Alabi

Film & Media

Award winning TV & Film Producer.

Chika Nwobi

Technology

Renowned investor & technologist that brought digital music licensing to Africa.

MI Abaga

Music

Award winning Musician, Music Executive & Festival Producer.

Jibolu Ayodele

Partnerships

Ex- Viacom Business Development, Manager & photographer of renown visual artist, Laolu Senbanjo.

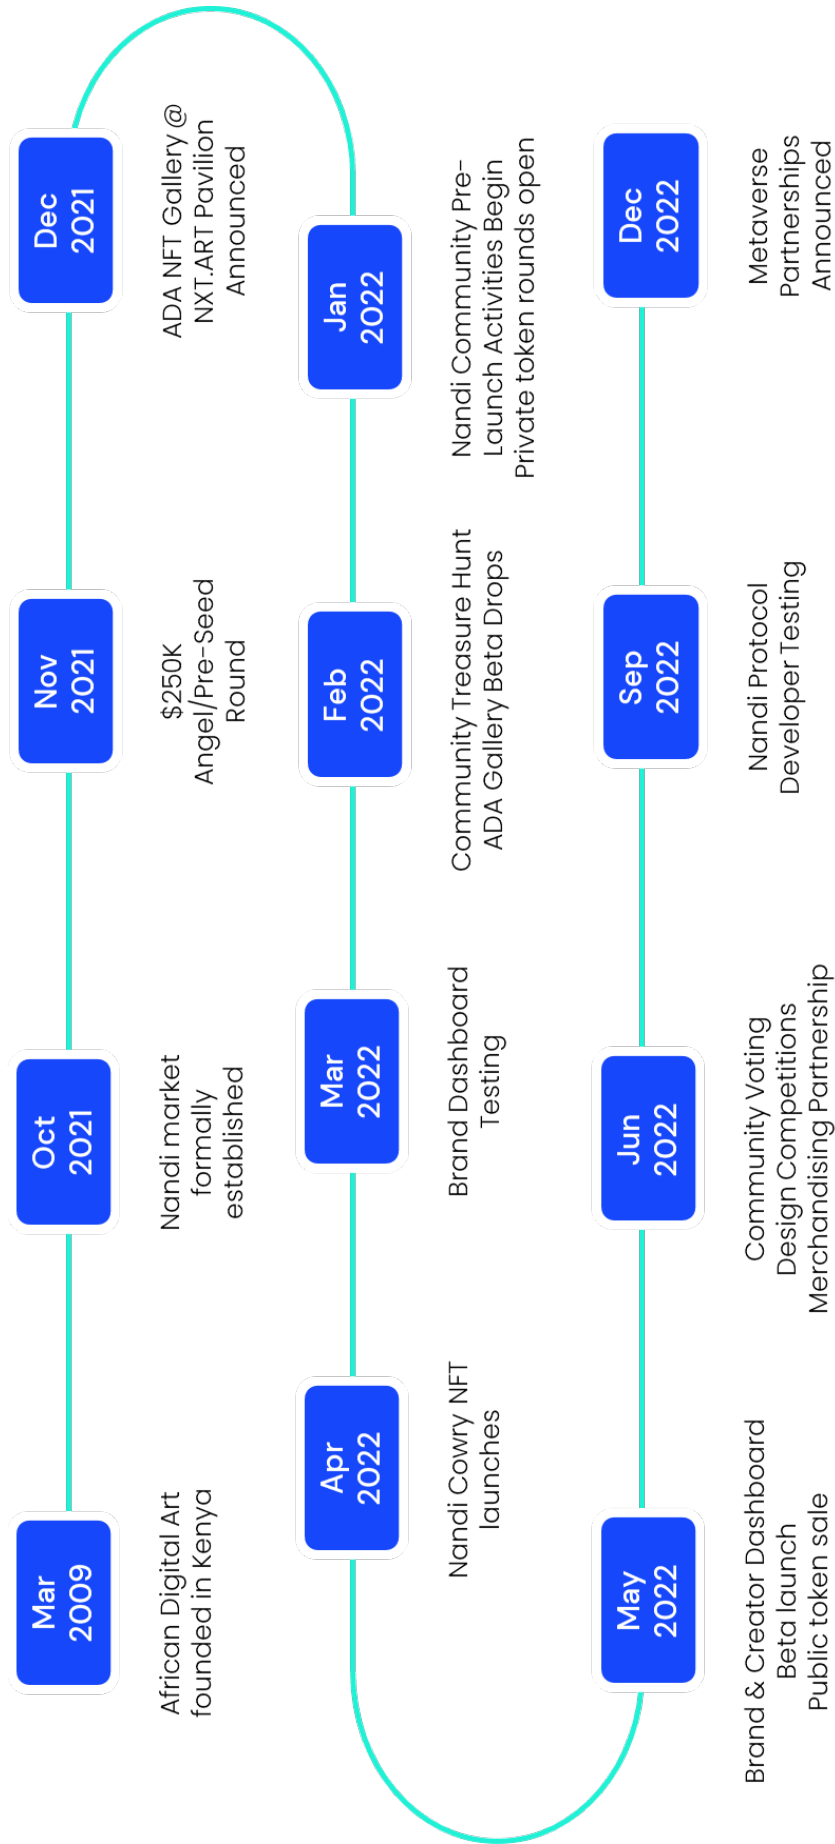

Umindi Francis

Branding

Founder of internationally awarded brand development firm & leads brand development at Infinite World.

ROADMAP

DISCLAIMER

In consideration of Nandi, legal ADA Marketplace Inc, (the “Company”) providing this Whitepaper to the recipient, the recipient acknowledges that the contents of this Whitepaper are confidential to the Company and the recipient agrees not to disclose, distribute or permit to be communicated verbally, directly or indirectly or otherwise, or to otherwise publish the contents of this Whitepaper except with the prior written consent of the Company. For the purposes of this acknowledgement “recipient” includes, without limitation, any principal, employee or agent of the recipient.

This Whitepaper, and any offers made within it, is solely for Participants. This Whitepaper provides a summary of the main features of the Company. It contains general advice only and has been prepared without taking into account any participant’s objectives, financial situation or needs. Participants should read the Whitepaper carefully and assess whether the information is appropriate for them in respect of their objectives, financial situation and needs.

This Whitepaper does not purport to contain all the information that a prospective participant may require. In all cases, interested parties should conduct their own investigation and analysis of the Company and the data contained in this Whitepaper.

The Company does not make any representation or warranty as to the accuracy or completeness of the information contained in this Whitepaper. Furthermore, the Company shall not have any liability to the recipient or any person resulting from the reliance upon this Whitepaper in determining to make an application to apply for shares in the Company.

The Company considers that the financial and non-financial information contained in this Whitepaper has been prepared to the best of its reasonable knowledge and ability. However, recipients must rely on their own investigation of all financial information and no representations or warranties are or will be made by the Company as to the accuracy or completeness of such information. The Company makes no representation about the underlying value of the tokens on offer. Prospective participants must make their own assessment about whether the price of the tokens being offered represents fair value.

Risk

You acknowledge and agree that there are numerous risks associated with purchasing \$NANDI, holding \$NANDI, and using \$NANDI for participation in the Nandi Market and Ecosystem. In worst scenario, this could lead to the loss of all or part of the \$NANDI which had been purchased. IF YOU DECIDE TO PURCHASE \$NANDI, YOU EXPRESSLY ACKNOWLEDGE, ACCEPT AND ASSUME THE FOLLOWING RISKS:

Uncertain Regulations and Enforcement Actions

The regulatory status of \$NANDI is unclear or unsettled in many jurisdictions. The regulation of virtual currencies has become a primary target of regulation in all major countries in the world. It is impossible to predict how, when or whether regulatory agencies may apply existing regulations or create new regulations with respect to such technology and its applications, including \$NANDI and/or Nandi. Regulatory actions could negatively impact \$NANDI and/or Nandi in various ways. The Company, the Distributor (or their respective affiliates) may cease operations in a jurisdiction in the event that regulatory actions, or changes to law or regulation, make it illegal to operate in such jurisdiction, or commercially undesirable to obtain the necessary regulatory approval(s) to operate in such jurisdiction.

Inadequate disclosure of information

As at the date hereof, Nandi is still under development and its design concepts, consensus mechanisms, algorithms, codes, and other technical details and parameters may be constantly and frequently updated and changed. Although this paper contains the most current information relating to Nandi, it is not absolutely complete and may still be adjusted and updated by the Nandi team from time to time. The Nandi team has no ability and obligation to keep holders of \$NANDI informed of every detail (including development progress and expected milestones) regarding the project to develop Nandi, hence insufficient information disclosure is inevitable and reasonable.

Competitors

Various types of decentralized applications and networks are emerging at a rapid rate, and the industry is increasingly competitive. It is possible that alternative networks could be established that utilize the same or similar code and protocol underlying \$NANDI and/or Nandi and attempt to re-create similar facilities. Nandi may be required to compete with these alternative networks, which could negatively impact \$NANDI and/or Nandi.

Loss of Talent

The development of Nandi greatly depends on the continued cooperation of the existing technical team and expert consultants, who are highly knowledgeable and experienced in their respective sectors. The loss of any member may adversely affect Nandi or its future development. Further, stability and cohesion within the team is critical to the overall development of Nandi. There is the possibility that conflict within the team and/or departure of core personnel may occur, resulting in negative influence on the project in the future.

Failure to develop

There is the risk that the development of Nandi will not be executed or implemented as planned, for a variety of reasons, including without limitation the event of a decline in the prices of any digital asset, virtual currency or \$NANDI, unforeseen technical difficulties, and shortage of development funds for activities.

Security weaknesses

Hackers or other malicious groups or organizations may attempt to interfere with \$NANDI and/or Nandi in a variety of ways, including, but not limited to, malware attacks, denial of service attacks, consensus-based attacks, smurfing and spoofing. Furthermore, there is a risk that a third party or a member of the Company, the Distributor or their respective affiliates may intentionally or unintentionally introduce weaknesses into the core infrastructure of \$NANDI and/or Nandi, which could negatively affect \$NANDI and/or Nandi. Further, the future of cryptography and security innovations are highly unpredictable and advances in cryptography, or technical advances (including without limitation development of quantum computing), could present unknown risks to \$NANDI and/or Nandi by rendering ineffective the cryptographic consensus mechanism that underpins that blockchain protocol.

Value Risks

Tokens issued by Nandi may drop substantially in value or may remain illiquid for long periods of time or indefinitely. Nandi cannot guarantee an active secondary market for the exchange of tokens purchased in the token sale. Not all disclosures or statements are being made in this disclaimer section. Participants should review the token sale agreement in its entirety and seek the professional advice of legal counsel and investment professionals.

\$NANDI may change in value based on a number of factors that are outside our control. There is no guarantee or expectation that \$NANDI will increase in value, provide a return, or have sufficient adoption and liquidity on exchanges. Owning these tokens does not constitute a share of equity or ownership in the company. The token economy is new and exciting. Regulatory circumstances may require that token mechanics be changed or altered.

\$NANDI do not have any rights, uses, purpose, attributes, functionalities or features, express or implied, including, without limitation, any uses, purpose, attributes, functionalities or features on the Fayre platform. Company does not guarantee and is not representing in any way to the buyer that the Fayre tokens have any rights, uses, purpose, attributes, functionalities, or features. \$NANDI may have no value. The company reserves the right to refuse or cancel \$NANDI purchase requests at any time at its sole discretion.

Participant Warning

Participation in a token sale carries high risks. It is highly speculative and before participating in any project about which information is given, prospective participants are strongly advised to seek appropriate professional advice; the information contained in this Whitepaper has been prepared by or on behalf of the Company. Fayre has not undertaken an independent review of the information contained in this Whitepaper.

Prominent Statements

The information contained in this Whitepaper about the proposed business opportunity is not intended to be the only information on which a decision is to be made and is not a substitute for a disclosure document, or any other notice that may be required under law. Detailed information may be needed to make a token participation decision; prospective participants should be aware that no established market exists for the trading of any tokens that may be offered.

Future Statements

Except for historical information, there may be matters in this Whitepaper that are forward-looking statements. Such statements are only predictions and are subject to inherent risks and uncertainty. Forward-looking statements, which are based on assumptions and estimates and describe the Company's future plans, strategies, and expectations are generally identifiable by the use of the words 'anticipate', 'will', 'believe', 'estimate', 'plan', 'expect', 'intend', 'seek', or similar expressions. Participants are cautioned not to place undue reliance on forward-looking statements.

By its nature, forward-looking information involves numerous assumptions, inherent risks and uncertainties both general and specific that contribute to the possibility that predictions, forecasts, projections and other forward-looking statements will not occur. Those risks and uncertainties include factors and risks specific to the industry in which the Company operates as well as general economic conditions. Actual performance or events may be materially different from those expressed or implied in those statements.

All forward-looking statements attributable to the Company or persons acting on behalf of the Company are expressly qualified in their entirety by the cautionary statements in this section. Except as expressly required by law, the Company undertakes no obligation to publicly update or revise any forward-looking statements provided in this Whitepaper whether as a result of new information, future events or otherwise, or the risks affecting this information.

None of the Company, its officers or any person named in this Whitepaper with their consent, or any person involved in the preparation of this Whitepaper, makes any representation or warranty (express or implied) as to the accuracy or likelihood of fulfillment of any forward-looking statement except to the extent required by law. The forward-looking statements reflect the views held only as at the date of this Whitepaper.

Other Risks

In addition, the potential risks briefly mentioned above are not exhaustive and there are other risks (as more particularly set out in the Terms and Conditions) associated with your purchase, holding and use of \$NANDI, including those that the Company or the Distributor cannot anticipate. Such risks may further materialize as unanticipated variations or combinations of the aforementioned risks. You should conduct full due diligence on the Company, the Distributor, their respective affiliates, and the Nandi team, as well as understand the overall framework, mission, and vision for Nandi prior to purchasing \$NANDI.

Nandi recommends and encourages that for any cryptocurrency held, bought, or sold, a financial advisor should first be consulted. Please ensure that you perform your own due diligence.

Do not invest without being 100% certain of what you are investing in.

With your purchase of Nandi, you are aware that you are not purchasing a security or investment. You also agree to hold all members of the development team harmless and not liable for any losses or taxes you may incur. You also agree that the team is presenting the token "as is" and is not required to provide any support or services.
